

NEWSLETTER N°6

JUNE 2019

**Replicable and easily trans-
portable pilot plant**

UP TO NOW

The assembly and installation of the demonstration plant in the HUERCASA facilities has been completed and the first tests have already begun.

The LIFE ALGAECAN project was presented at the CARTIF facilities in the month of May to the chemistry students of the University of Salamanca, explaining the objectives and development of the project.

On 19th June the second monitoring meeting of the Project was held at the HUERCASA facilities. The project consortium accompanied by María Rodríguez, NEEMO's monitor, visited the plant and explained the operation of the different equipment.

The LIFE ALGAECAN Project was present at the 7th International Conference on Sustainable Solid Waste Management (26-29 June) in Heraklion, Crete.

In the final event of the CyclAlg project, AlgEn talked about the ALGAECAN Project and connected technology centres, consortia of other projects and institutions working with algae, agriculture and waste water treatment. It took place in Pau, France, on 14-16 April.

NEXT...

Once the operations of the pilot plant have begun, the next few months will be devoted to continuing working in the plant, carrying out different tests to achieve the best conditions for treating effluents and drying microalgae.

The LIFE ALGAECAN project will continue its dissemination activities in the coming months, including the presentation of the preliminary results obtained:

- IWAAlgae 2019 Congress on 1 - 2 July (Valladolid, Spain) by CARTIF&AlgEn.
- Workshop "Shaping the EUROPE of Tomorrow" in Brussels on 18 September.

Shaping the
EUROPE
of Tomorrow

We do not want to stop meeting more followers! Whether you represent a facility which performs: Treatment and processing of animal and/or vegetable materials in food and/or drink production, Fertilisers production or Animal feeding production, LIFE ALGAECAN invites you to participate as an observer in the different stages of the project. To do so, simply complete the questionnaire on our website :
